Prevention from breaking the connection pool

```
// Connection Pool
const db = mysql.creatPool({
host: process.env.DB_HOST,
user:process.env.DB_USER,
password: process.env.DB_PASSWORD,
database: process.env.DB_NAME,
waitForConnections: true,
connectionLimit: 10, //Adjust based on your needs
queueLimit: 0  //Unlimited waiting requests in the queue
connectionTimeout: 10000, // 10 seconds for establishing
connections
```
